

NIPESH BASTOLA

+977-9863374026 | lionipeshbastola10@gmail.com | Pokhara-Lekhnath, 22 Kaski

EDUCATION

School Of Engineering, Pokhara University (PoU)

2021-2025

Bachelor in Engineering (Civil) | CGPA: 3.77

Pokhara, Nepal

PROFESSIONAL SUMMARY

Dedicated Civil Engineer (3.77 CGPA) with practical experience in site supervision, QA/QC, and subcontractor coordination. Proficient in AutoCAD and SketchUp, excelling at translating complex structural principles into safe, efficient on-site execution. Seeking to leverage strong technical and logistical skills to drive project success at a leading construction firm.

PROFESSIONAL EXPERIENCE

Apex Builders Private Limited

Dec. 2025 – Present

Site Engineer

Pokhara, Nepal

- Manage daily on-site QA/QC protocols for civil works, ensuring all materials and structural executions meet specified engineering standards.
- Supervise site logistics and coordinate workflow among subcontractors to maintain strict project timelines.
- Conduct regular site inspections to enforce occupational health and safety (OHS) regulations and minimize workplace hazards.
- Assist in the verification of Bar Bending Schedules (BBS) and concrete mix ratios prior to major pour events.

Citizens Engineers and Builders Pvt. Ltd.

Sept. 2025 – Feb. 2026

Design Engineer

Pokhara, Nepal

- Drafted detailed 2D building layouts and structural blueprints using AutoCAD, ensuring strict compliance with local municipal building codes.
- Supported senior structural engineers in performing preliminary load calculations and structural modeling utilizing ETABS and SAP2000.
- Collaborated with the project management team to translate conceptual architectural designs into actionable construction documents and technical specifications.

ACADEMIC PROJECTS

Experimental Study on Plastic Fiber Reinforced Mortar | 8th Semester Project

- Investigated the mechanical properties of mortar modified with plastic fibers to analyze its impact on flexural, shear, and compressive strength.
- Conducted rigorous laboratory testing to evaluate material durability and promote sustainable, cost-effective construction practices.

Seismic Failure Analysis of Buildings in Jajarkot | 5th Semester Project

- Performed a comprehensive structural failure analysis of buildings affected by the recent Jajarkot earthquake.
- Assessed seismic vulnerabilities and identified critical structural defects to recommend resilient, earthquake-resistant design methodologies.

Bio-Engineering Applications in Nepal | 3rd Semester Project

- Researched sustainable bio-engineering techniques tailored specifically to mitigate risks associated with Nepal's unique topographical challenges.
- Explored practical methods for slope stabilization and soil erosion control by integrating natural vegetation with civil infrastructure.

SKILLS & LANGUAGES

Site Execution & Management: Building Construction Supervision, Building Layout, QA/QC, Subcontractor Coordination, OHS Compliance

Estimation & Billing: Bill of Quantities (BOQ), Bar Bending Schedules (BBS), Estimation & Valuation, Running & Final Bill Preparation

Surveying & Instruments: Auto Level, Theodolite, Total Station, Laser Tools

Software Proficiency: AutoCAD (2D Drafting), SketchUp, ETABS, SAP2000, MS Project (Scheduling), MS Office Suite (Excel for Estimation)

Languages: Nepali (Native), English (Fluent), Hindi (Conversational)
